## Provisioning SAP HANA Cloud

### Mission Summary:

Best Run Travel Wants to Identify the top 5 partners and the days with maximum booking for the top 5 partners.

### Step by step

#### 1. Check entitlements

Pastikan bahwa terdapat entitlements seperti dibawah ini

SAP HANA Cloud	hana-cloud-tools-trial	tools (Application) ⓘ	1 shared units ⓘ	1 shared units ⓘ	🗑️
	hana-cloud-trial	hana-cloud-connection ⓘ	1 shared units ⓘ	1 shared units ⓘ	🗑️
		hana ⓘ	1 shared units ⓘ	1 shared units ⓘ	🗑️
		relational-data-lake ⓘ	1 shared units ⓘ	1 shared units ⓘ	🗑️
SAP HANA Schemas & HDI Containers	hana	hdi-shared ⓘ	10 shared units ⓘ	10 shared units ⓘ	🗑️
		schema ⓘ	10 shared units ⓘ	10 shared units ⓘ	🗑️
		sbss ⓘ	10 shared units ⓘ	10 shared units ⓘ	🗑️
		securestore ⓘ	10 shared units ⓘ	10 shared units ⓘ	🗑️

Jika tidak ada, bisa ditambahkan dengan click configure entitlements-> cara entitlements yang diinginkan -> add services plans-> save.

#### 2. Create instance BestRunTravel

Instance Name: \*

BestRunTravel

⚠️ After the instance has been created, you can no longer change its name.

Description:

My data from Best Run Travel

12 characters remaining

3. Klik next step, karena menggunakan akun trial maka configuration dibawah tidak dapat diubah.

### 3. SAP HANA Database

 SAP HANA Cloud Trial instances have a fixed storage size and storage type. For more information, follow [this hands-on tutorial](#).

Memory:

— 30 + GB

Storage:

120 GB

Compute:

2 vCPUs

4. Klik next step, SAP Hana Advanced Setting

Allowed connections:\*

- ☐ Allow only BTP IP addresses
- ☒ Allow all IP addresses
- ☐ Allow specific IP addresses and IP ranges
- (in addition to BTP)

**Cloud Connector**

Enables the cloud connector. This allows you to connect to an SAP HANA on-premise system from your SAP HANA database instance.

Allowed connections:\*

- ☒ Allow all IP addresses
- ☐ Allow specific IP addresses and IP ranges
- (in addition to BTP)

5. Klik next menuju data lake.

### 6. Data Lake

Create Data Lake:

Creates a data lake instance that is integrated with your SAP HANA database instance. The data lake instance is composed of data lake Relational Engine on trial.

**Basics**

Instance Name:\*

BestRunTravelDL

When adding an integrated data lake instance, both DBADMIN and HDLADMIN administration users are automatically created with the same password.

 After the instance has been created, you can no longer change its name.

Administrator:  
HDLADMIN

Associated SAP HANA Database Instance:  
BestRunTravel

6. Klik create instance untuk membuat instance BestRunTravel dan BestRunTravelDL

My data from Best Run Travel
